

What is Conscience?

A conscience is the voice in your head, and the feeling in your heart, that tells you if something is right or wrong. Your conscience works like a super computer that compares what you are about to do against your core values to help you know if your actions are right or wrong.

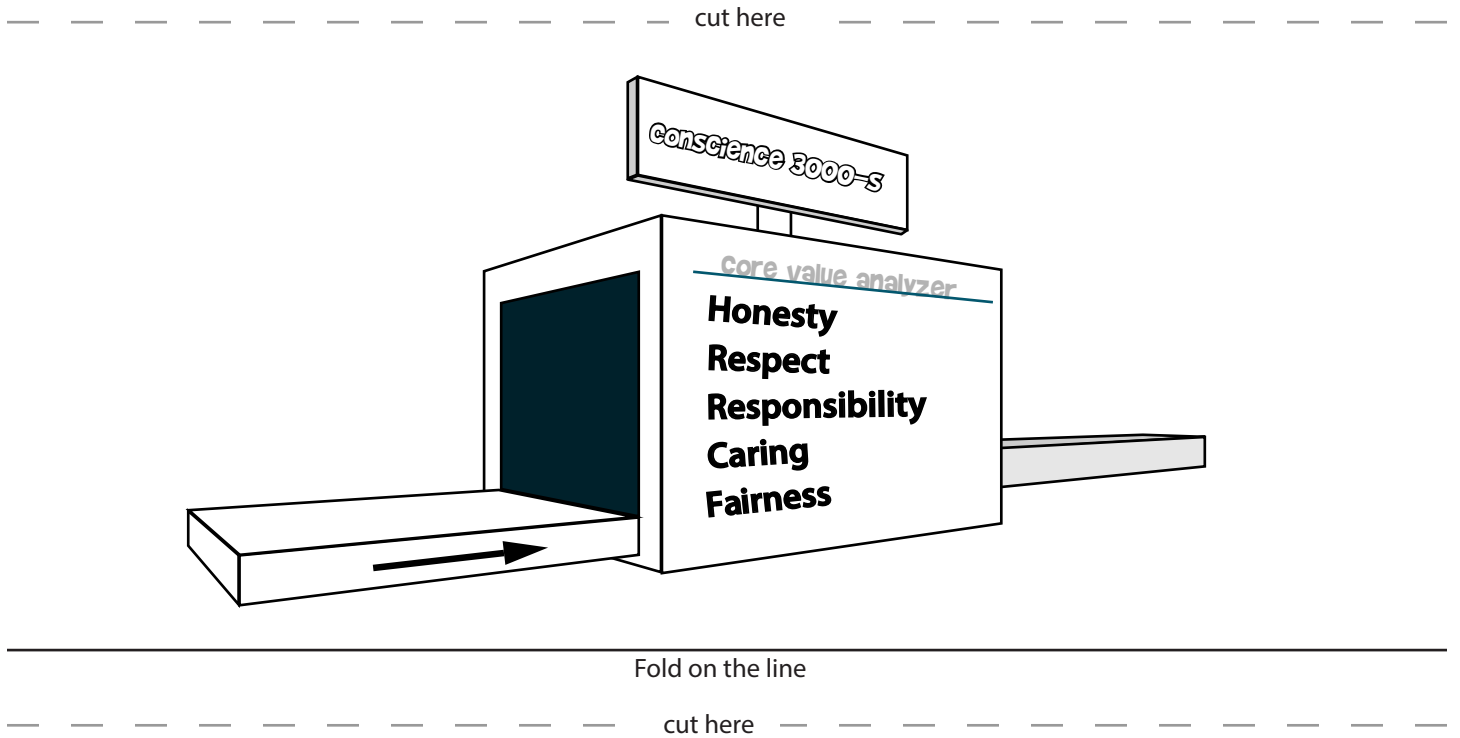

Place an action in the Conscience 3000-S and see what happens when the action is compared against traits like Honesty, Respect, Responsibility, Caring, and Fairness:

Now turn the page and build your own Conscience 3000-S.

What is Conscience Activity, Page 2

Computer: Color your Conscience 3000-S super computer. Cut on the dashed lines, and fold on the solid line. Glue to the next page.

Input Actions: Cut out the input actions.

| | |
|--|--|
| Peeking at the answers on your classmate's test. | Telling your dad the truth that you lost your basketball, even if you'll get in trouble. |
| Breaking a window and blaming it on your friend. | Telling your friends to ignore someone because you don't like her clothes. |
| Finishing your homework before watching TV. | Being quiet in the library while others are reading. |

Output Answers: Cut out the output answers

| | |
|-------------|-------------|
| Feels Wrong | Feels Right |
| Feels Wrong | Feels Right |
| Feels Wrong | Feels Right |

Glue the Conscience 3000-S Here- Fold and paste the flap so your computer stands up.

Make your computer work- Put in your inputs and test your outputs.
When you input an action, how does it compute with what you know about Honesty, Respect, Responsibility, Fairness and Caring?

Show your work- When you like your answers, glue them in the boxes below.
